Some pictures of Brett's demonstration.

(Sorry, the florescent lights on a shiny surface played havoc with my camera so a lot of pictures were out of focus)

Notice where Brett is sanding. The final picture will show the results.

If you look close to the left of the scratch (white line) you can see the repair. More buffing will make that disappear.

I am looking for articles from members of projects they are working on, places they have been with their car, stories about their car, or anything you think the other members might find interesting. What you send me does not have to be print ready. Just a simple e-mail telling the story or supplying the details (with or without pictures) and I'll rewrite it into the newsletter format then send you a proof copy to read before it is published. If you have anything that you feel I could use in the newsletter please email it to [naugary@yahoo.com](mailto:naugary@yahoo.com) or bring what you have to the next meeting.
